REPORT OF THE SEWERAGE AND SEWAGE TREATMENT ADVISORY COMMITTEE

This will report progress as of the end of January, 1971. Sometimes it has seemed to your Committee that progress has been mostly in the accumulation of papers, but actually there has been accomplishment since our lengthy report last year.

At the 1970 Town Meeting we voted \$75,000.00 for final plans and specifications for a sewerage system with treatment facilities. The Selectmen have not yet borrowed for disbursement under this continuing authorization, but will shortly in a more favorable money market.

After long negotiations between the New Hampshire Water Supply and Pollution Control Commission staff and Fenton G. Keyes Associates, a design agreement was finally executed between Town, State, and Consultant early in October of 1970. The agreement includes updating the study and report of 1965 and evaluating the oxidation ditch method of secondary treatment, as well as preparing contract plans. Fenton Keyes has procured the aerial photographic planimetric basic maps for design, and field survey will proceed as weather permits.

Design itself, however, has been delayed by the continuing issue as to whether the industrial wastes of the Contoocook Valley Paper Company can or should be received in the municipal system, as desired by the Water Supply and Pollution Control Commission. Re-examination of the mill discharges by our consultant a year ago found mill waste volume so large as to require more than doubling the size of the treatment plant, among other adverse findings. In subsequent meetings, the volume figures were questioned, and mill officials indicated piping changes were planned to re-cycle much of their waste water. These piping changes have finally been completed, and the Mill's Consultant Engineer is conducting

a survey. His report is expected by mid-February. Hopefully, this matter can be resolved soon thereafter, and design can proceed.

College representatives have suggested that the Town install water meters so that sewer operating charges can be based on water use, rather than occupancy schedules.

Effective date of the State order to the Town to abate pollution has been extended to July 20, 1971. Under terms of our design agreement contract plans may not be ready until October of 1971. Further extension of the order will have to be requested, and it appears unlikely the Town will be acting on construction before the 1972 Meeting.

Respectfully submitted,

GEORGE A. SANBORN,

Chairman

HEALTH OFFICER'S REPORT

Henniker, N. H.

SELECTMEN

Town of Henniker

Henniker, New Hampshire

Dear Sirs:

Overall during the year 1970, our community's inhabitants have experienced good health, with only the usual sickness, such as childhood diseases, flu or viruses, to name a few.

Complaints reported to the undersigned were looked into and if they were related to or considered to be, health hazards were further investigated. The majority were corrected, the remainder are still pending for lack of evidence and therefore are still under investigation.

The required water samples of the Cogswell Spring Water Works were sent to the State Water Testing Laboratory and the returned reports were satisfactory.

Several buildings used as public places were inspected for sanitary conditions and found to be adequately cared for.

Respectfully Submitted,

GEORGE M. PARMENTER,
Health Officer
Town of Henniker, N. H.

POLICE DEPARTMENT

Significant progress was made during the past year through the cooperation of the entire community, thus enabling this Department to serve more effectively, the people of Henniker.

Foremost among these developments was the expanded consideration given to the safe movement of pedestrian and vehicular traffic throughout our town. A School Safety Patrol was initiated consisting of twelve students selected from both the fifth and sixth grades. These students were trained relative to safety procedures. Their assistance at various school crossings and in the play area during recess periods has proven to be an effective aid to the safety and protection of our children.

To further encourage pedestrian safety, particularly in the area of the Square, additional crosswalks have been provided. Signs were erected at the four major roadways leading into the Square cautioning motorists to "Yield To Pedestrians In Crosswalks". Additional pedestrian safety has been achieved through the new policy of sidewalk snow removal thereby making it unnecessary for foot traffic to use the roadway.

Parking on Main Street, although somewhat improved, still constitutes a serious problem. This situation is due to the lack of adequate parking facilities together with the increased number of motor vehicles in the community. A total of 247 parking tickets were issued during the year 1970. This, however, has not entirely corrected the situation. Continued enforcement of the parking regulations and the willingness of all concerned to fulfill their responsibility by not abusing these parking privileges should help to alleviate this problem.

Crime increase is not unique to Henniker. It has increased throughout most sections of the country. The causes — social, human and material, that contribute to these trends have

placed new and increasing demands on law enforcement duties. Through expanded personnel training and the extension of patrol procedures this Department hopes to provide the best possible police services to the people of this community.

Our sincere thanks to the people of Henniker for the cooperation extended this Department. We trust that we shall continue to merit your support.

Respectfully submitted,

THOMAS W. HASSLER,
Chief of Police

THE HENNIKER RESCUE SQUAD

The Henniker Rescue Squad came into existence in December, 1969. It arose from the recognition by certain townspeople that Henniker needed a twenty-four hour ambulance service, manned by trained emergency medical personnel. All Squad members have passed the Red Cross Advanced First Aid Training Program.

This service is being provided by volunteers. There is no charge for help provided. The only cost borne by the town is several hundred dollars for insurance for both the vehicle and the personnel. Contrasted with this small cost is the value of contributed time by the Squad — more than 2500 hours in the past fifteen months — and money raised with which we have purchased, modified, and outfitted the emergency vehicle. This last amount alone is more than two thousand dollars.

The Henniker Rescue Squad realizes it does not function in place of a doctor or hospital, but rather acts to safely, rapidly, and efficiently transport the patient to the doctor or hospital where the equipment which is so often needed exists.

The Squad also realizes it does not function in place of Mr. Kenneth Holt's commercial enterprise of non-emergency patient transfer between home, nursing home, and hospital.

The Henniker Rescue Squad is a unit of the Henniker Police force. The members of the Squad greatly appreciate Chief Hassler's help and encouragement. The Squad is also grateful to Ayer and Goss, Inc., for the use of garage space in its complex, so that the ambulance might be centrally located.

The members are Daymon Murdough, President, Eddie Aucoin, Vice President, Jim Houghton, Secretary, George Mortimer, Treasurer, Rick Mitchener, Jim Crane, Steve Hilyard, Steve Ludwick, Joe Parris, Ken Stafford and Larry Damour.

REPORT OF THE FOREST FIRE WARDEN AND DISTRICT CHIEF

The 1970 forest fire season was a quiet one in this area, quiet in part because of your continued cooperation and favorable weather conditions.

Fires that did occur were, for the most part, caused by debris burning, children and smokers.

The elimination of these three causes of forest fires would drastically change this picture — to bring about this change we make the following suggestions:

1. When the ground is not covered with snow a permit to burn must be obtained from the Forest Fire Warden. This permit covers waste burning, even if in an incinerator, grass burning, as well as garden trash and brush burning such burning is restricted by regulation to prior to 9:00 A.M. and after 5:00 P.M. with the following exceptions: Commercial or industrial burning is permissible at any time under normal conditions but only with the approval of the District Chief and a written permit from the Forest Fire Warden.
2. Fires caused by children can be prevented only with the complete cooperation of parents in the supervision of their children, keep matches out of reach of children, this action will help to prevent fires and may save a life, the life of your child. Try to explain this to your child, won't you?
3. Forest fires caused by smokers can be reduced in number by the exercise of more care in the discarding of matches and smoking material whether from a vehicle or by a hiker. In all cases, make sure that the butt or match you discard is out, dead out. Smokey says, "Thanks for your help", and invites you to join with him in setting a good

example for others in the prevention of fires and the protection of our environment.

CIVIL DEFENSE

The Henniker Civil Defense Program is entirely a voluntary program.

Last summer an Emergency Operations Simulation training course was held. The three selectmen, fire chief, police chief, civil defense director and several other interested citizens took part in the program. Also represented were the Highway Department, Water Department, and the Rescue Squad making a total of 22 persons participating.

The course, which was sponsored by the Division of Continuing Education at the University of New Hampshire, showed one way in which the town could operate under disaster conditions.

Plans are being made this year for a course in Community Emergency Planning and Operations.

REPORT OF THE LIBRARY TRUSTEES

Perhaps the most single important accomplishment of the Tucker Free Library this year has been the completion of the Francis Lane Childs Historical Room, as of now, which does not mean that it is a finished project but that it is now in use. The plans for its future are as vital to the town as is its present state. Before work began on it, it was a rough, unfinished dirt-floored storage room and we are quite pleased with the fact that it is now most distinguished in appearance as well as efficiently planned for use without having cost the Town any more than was originally allocated for the purpose. A complete list of money spent is attached to this report and a visit to the room will show you that everyone who contributed to it actually contributed much more than was charged to us. This list does not include the many people who gave many hours of labor toward the project at no cost to the Town.

At the present time the room is open to the public on Thursday afternoons between the hours of 3 and 5, and it is planned to increase these hours in the near future. Historical displays are changed regularly, and displays of the work of local artists and craftsmen are also changed regularly. One of the most pleasant results of the completion of the room is the warm interest shown in it by Henniker school children, who visit it often either with their teachers or after school hours.

Two other large storage rooms in the basement of the Library are now being cleared and cleaned, to be used as storage centers for the main historical collection. Work on organizing and storing the collection in these quarters will begin shortly by volunteer help.

The second most important activity of the Library this year has been the additions and improvements in the Hollis

Children's Room on the main floor of the Library. A new carpet has been installed, which makes the room much more attractive, and cuts down considerably on the noise level which can rise to quite a height when groups of up to fifty children are using it, either accompanied by their teachers from school or as part of the summer library programs for children. New bookcases and other furnishings for the room will be added this coming year. Money from the Anna Childs Fund, donated in memory of this honored former Trustee, will be used for a special project for the room.

This report would not be complete without a word of praise to our excellent librarians, Evelyn and John Hollis. They are always courteous, helpful, and efficient, and are responsible for seeing that Henniker residents have an unusually good selection of the latest books available to them. (This last is frequently noted by our summer residents, who find it easier to borrow a new and popular book from the Tucker Free Library than from the much larger libraries in the towns where they live the rest of the year.)

Your library is growing all of the time, expanding its capacity, and enlarging the services it offers to you as a patron. We hope you will continue to use it and will let us know at once of any way in which we can improve it.

Respectfully submitted,

TRUSTEES OF TUCKER FREE LIBRARY

HENNIKER PLANNING BOARD

ANNUAL REPORT 1970

The Henniker Planning Board holds regular meetings once each month except June, July, and August and special meetings as needed. All meetings are open to the public.

The January meeting was on the "Right to Know Law". In conformity, our meeting notice is posted in two places in the town, and meeting minutes are available to the public within 72 hours. Minutes must show the purpose of the meeting, those present, and those taking part. Final preparations were made for the Zoning Hearings. A telephone campaign was organized to get people out.

In February the Zoning Hearings were held with good citizen interest. Several changes were made in the Ordinances as well as the new street map. Doug Hatfield, Esq., gave a good talk on Subdivision Regulations in Hillsboro and urged the Town of Henniker to adopt similar regulations.

March was a very busy month. Zoning failed by 39 votes at Town Meeting, but the Subdivision Authority passed. The Town voted to join the Central New Hampshire Planning Commission. The new Street Map was published and distributed. Special meetings were held to draw up new Subdivision Regulations. The Planning Board assisted the Selectmen in drawing up new Street Regulations. Attorney Robert Howard was hired to write the Subdivision Regulations.

The April meetings were taken up with perfecting the proposed Subdivision Regulations. A. Holton and R. Simpson were appointed as Town Representatives to the new Central New Hampshire Regional Commission.

In May the hearing on Subdivision Regulations was held. There being no changes, it was unanimously adopted by the Board on May 20th. It was recorded in the Registry of Deeds

on May 22nd. The first subdivision was approved in May, the second in August, and there have been several more approvals thru December. There have been no refusals.

In September a general meeting was held with several town and college people in attendance. Mr. David Rogers, new Planning Director of the Central New Hampshire Planning Commission, spoke on Town Planning. A. Holton introduced the New England College students who are working on a new project, "The Updating of the Town Property Map", for the Town. This will take considerable time and effort.

A well-attended joint meeting was held in October with the Henniker Sewer Committee and the Conservation Committee, to establish Town needs and priorities for a "Master Plan". The Zoning Ordinance was distributed for comments and changes.

In November and December there was increased subdivision activity, and progress made on the Town Property Map. A special meeting was held with the Conservation Committee to establish "map scales" for the Town. It was proposed by the College, and accepted by the Selectmen, to have two senior college students establish a Computer Program for making up the Town Tax Bills and other pertinent information. The Zoning Ordinance was partly rewritten and a new Zoning Map proposed for February hearings.

The Board asks your support at this Town Meeting for Zoning, the annual appropriation for the Central New Hampshire Regional Planning Commission, and a "Master" or "Comprehensive" Plan which is proposed with 2/3 Federal Funds available and a 1/3 Town share. The Town share is to be split 50-50 with the College.

Respectfully submitted,

A. HOLTON, *Secretary*
Henniker Planning Board

ANNUAL REPORT OF THE HENNIKER COMMUNITY CENTER

In 1970 the Henniker Community Center continued its role to sponsor a youth program for the youth of the Town. Fund raising activities are at a standstill and our support is dependent entirely upon the generosity of the Town.

As related to you last year the "Center" is serving no purpose at present except for storage. We recommend that other use be made of this facility to keep it from falling into complete disrepair.

Our major sports programs — Little League Baseball and Basketball and the Towns Basketball teams continued with improved attendance this year. The renewed interest in our baseball program is reflected in the purchase of new equipment.

The Center also participated in the Skating Rink at the rear of the Fire Station last winter and during the summer months joined the New England College in providing a supervised Youth Program for all the students in our schools (boys and girls). The Center also contributed towards the supervision of the swimming area at Pleasant Pond utilized by so many of our Town's people.

It is our hope that the Henniker Community Center will continue to be supported so that these programs will be maintained. The following is a breakdown of the cost of the above mentioned programs in 1970:

SCHOOL WARRANT

To the Inhabitants of the School District in the Town of Henniker qualified to vote in district affairs:

You are hereby notified to meet at the Cogswell School Auditorium in said district on Tuesday, the ninth day of March 1971 at ten o'clock in the morning to act upon the following subjects:

1. To choose by non-partisan ballot the following school district officials with the polls to open at 10:00 A.M. and close at 8:00 P.M.

- A. Moderator for the ensuing year.
- B. Clerk for the ensuing year.
- C. Treasurer for the ensuing year.
- D. School Board Member for the ensuing three years.
- E. Auditors for the ensuing year.

Articles 2 through 7 will be taken up at 7:00 P.M.

2. To hear reports of agents, auditors, committees and officers chosen and to take any action relating thereto.

3. To choose agents and committees in relation to any subject embraced in this warrant.

4. To see what sum of money the district will vote to raise and appropriate for the support of schools, for payment of salaries of school district officials and agents and for the payment of statutory obligations of the district.

5. To see if the district will vote to authorize the school board to make application for, and accept on behalf of the district, any and all grants or other funds for educational

purposes which may now or hereafter be forthcoming from the United States Government or from the State of New Hampshire for the school year 1971-72.

6. To see if the district will vote to raise and appropriate the sum of 1,000 dollars as a contingency fund or to take any other action relative thereto.

7. To transact any other business that may legally come before said meeting.

Given under our hands this 22nd day of February 1971 at said Henniker.

PRINCIPAL'S REPORT

The Henniker School System went through a change in administrative leadership in late August when Mr. Watman became the Assistant Superintendent of Supervisory Union #24 and I became principal of the Henniker School System. At this time I wish to thank the townspeople of Henniker for making my first year on the job an enjoyable one.

We opened the school year with four new teachers out of seven in the elementary school. Once the adjustment was made by the teachers and the students the elementary school continued to function with the goals established by my predecessor. Having two first grades eliminated the problems that confronted last years elementary school. The addition of the new room with wall to wall carpeting in the basement of the elementary school showed what a little initiative and money can do to solve space problems.

Strides have been made to continue the upgrading of the reading and the math program. Mr. Thomas Kimball of the high school staff is in the process of coordinating and upgrading the elementary math program.

The kindergarten, under the able direction of Thelma McManus, continues to function on a morning schedule allowing the boys and girls to take part in a pre-school experience.

The change in the daily schedule has made possible the planning of in-service training for the teachers. With this time we are hoping to be able to work on some of the new concepts in education and to pass on to the students of Henniker new learning experiences.

The high school opened the year with four new teachers out of eleven. The high school students should be complimented on the adjustments they made from the reins of Mr. Watman, my predecessor, to me.

Elimination of the daily activity period to the extra curricular period at the end of the day took some adjustment however, now the adjustment has been made, activities are starting to function between 2:25 — 3:15. Dropping the compulsory physical education for seniors and changing to a voluntary carry-over sports program is in the process of being evaluated.

The publishing of a bi-weekly newspaper by the students has been one of the highlights of the extra-curricular activities of the year. The forming of the Future Homemakers of America Club has added a new dimension to our Home Economics program. The inserting of mini-courses in this area is allowing for more girls to take part in this program.

We are in the process of evaluating the curriculum at the high school and we hope to come up with some additions to better meet the needs of the students.

With the adoption of the new schedule, Mr. Scully, our guidance director, has been able to add four hours a week to his guidance program.

The ultimate goal of the Henniker School System should be to provide the young people of Henniker with the opportunity to realize their fullest potential with the cooperation of the townspeople of Henniker. I hope that we can come closer to realizing this goal.

Respectfully submitted,

JOSEPH R. DISCHINO,

Principal

REPORT OF THE SUPERINTENDENT OF SCHOOLS

Your school system faces many major challenges as it enters the decade of the seventies. So, what else is new? We've said this at the start of every new decade, but still there is a lag between what we ought to be doing in our schools and what we actually are doing. My first report to you as your Superintendent will be devoted to a discussion of a few of the things we would like to see become reality. In essence it will represent our attempt to meet the challenges. I might add "our" is a collective term, for it is your concern as well.

To start with it is necessary to note that if our schools are to truly meet the challenges of the seventies then they must have programs that meet the needs of all children. I know, we've said this before, but I mean something more than tracks for the college and non-college bound, homogenous groupings, remedial education and such. It means things like non-graded schools, individualized instruction, independent study, small and large group instruction, broadened curricula that brings a greater variety of offerings to the student and a breaking away from the traditional grade organization and lock-step school scheduling. The emphasis must be placed on the individual and his needs and abilities and must be reflected in the structure and methods of the schools system. Our ever changing and dynamic society demands an education that prepares one to cope with it. Such is the challenge of the seventies.

What are we doing and what can we do? First what are we doing. You've heard enough about project CAPE our summer curriculum development project. Through this effort we have created an awareness of our needs in the area of social studies, reading and vocational education. For those who have been closely allied with the project it has been a most valuable in-service experience. For those who have served on projects resulting from the findings of CAPE there

too has been a valuable professional experience. For those not involved, as such, other experiences must be provided. Thus, the reality in the project itself and its benefits to those involved. The goal of the future is to restructure CAPE in such a way so as to create greater involvement and to bring to teachers the opportunity to learn new techniques. In particular, planning and using instructional objectives in the instructional process.

The special class begun in September is also a program to meet the needs of children. In this instance children who are mentally handicapped. Presently there is an enrollment of nine. A number of good things have accrued since its inception for the children involved. In addition to their regular classroom program, the class uses facilities at Hillsboro-Deering, attends assemblies and takes occasional field trips. For the future we need better means of identification, new facilities (and I might note we are deeply indebted to the Hillsboro Moose Lodge for the facilities provided) and find ways to involve these young people in the mainstream of school life where practical.

For the child who has learning disabilities, but not to the degree to warrant enrollment in the special class, the new program at Hillsboro-Deering holds bright promise. In this activity a person with expertise in the field of learning disabilities works with children in the process of identifying problems and then develops programs to correct them. This involves tutorial and small group sessions with the children, conferences with teachers to assist them in understanding the nature of the child's problem and the developing of ways to bring about its solution. Gone is the time when these children were herded together in a special room and so labeled and never to mix with their peers except for special instances. Now the child remains a part of his social group. The difference is that his problems are recognized and things are being done for him. The primary thing being understanding. Hopefully, this program will be adopted in Hopkinton with the idea of a shared service extending the program's benefits to the children of Henniker and eventually to all of the communities within the Union.

The non-graded school with its many benefits for children is a high priority item. Except for isolated efforts on the part of some teachers the idea has not begun to spread. We must begin to explore elementary school reorganization as it pertains to each community in view of the idea that each child is different, that his needs are different and that the present mode of school organization is not necessarily the best to meet the specific needs each child has. Reorganization refers to such thoughts as abolishing the grade labels as such (grade 1, grade 2 etc.) implementation of various modes of organization such as team teaching, small and large group instruction, individualization and continuous progress programs. The latter means that a child progresses at a pace consistent with his abilities and in such a way it is made certain he does not miss basic fundamentals which create the need for most remedial programs. Besides the many advantages for children, school reorganization can bring about better use of the instructional staff, change the emphasis on pupil-teacher ratio and use resources and facilities in different ways. It recognizes the need for in-service training for the staff and calls upon the community for a commitment to a type of educational program that can do much for children and perhaps be more economically efficient. Reorganization is also a must for high school, and for the same reasons. In addition if program expansion is to take place, a break from tradition is needed. Ways must be found to involve community resources in the instructional program. Open campus, schools without walls, independent and individualized study are just a few of the ways it may be possible for small high schools to meet the ever increasing needs of our youth without becoming too economically expensive to maintain. Again the emphasis must be on the need to provide for all students in a manner that is in tune with the tempo of the times.

I could go on, but I think this sets the tone. The reality of the situation and the direction of the future is a program that recognizes each individual for his worth, that makes a school an exciting and challenging place to be not just at the time a child begins but all the way through to graduation.

Tom Watman and I will devote our energies in this direction. We welcome the opportunity and the challenge to respond to the new decade. We solicit your support for it will be a joint effort if we are to be successful.

And in closing I resort to my tradition, that of a quotation that reflects the essence of what I have tried to say to you. This time I take a short paragraph written by Carl R. Rogers which appeared in the book, "Man Education and Manpower":

"In the world which is already upon us, the goal of education must be to develop individuals who are open to change, who are flexible and adaptive, who have learned how to learn, and are thus able to learn continuously. Only such persons can constructively meet the perplexities of a world in which the problems spawn much faster than their answers. The goal of education must be to develop a society in which people can live more comfortably with change than with rigidity. In the coming world the capacity to face the new appropriately is more important than the ability to know and repeat the old."

Respectively submitted,

DOUGLAS H. BROWN,

Superintendent
